INDEX TO VOL. IX.

Page

Note on the internal pressures at any point within a body at rest. By *J. B. Phear* 1

Solutions of problems 7

Exercises in the hyperdeterminant calculus. By *Rev. Geo. Salmon* 19

General considerations on conic sections in double contact with each other. By *Professor Steiner* 34

On Clairaut's theorem, and some matters connected with it. By *Matthew Collins* 46

The equations of surfaces considered as sums of homogeneous functions. By *Rev. Robert Carmichael* . . . 55

Note on the transformation of a trigonometrical expression. By *Arthur Cayley* 61

Remarques sur un mémoire de M. Cayley relatif aux déterminants gauches. Par *M. Hermite* 63

On a geometrical interpretation of the function $at^2 + bu^2 + etu$, with some applications. By *Thomas Weddle* . . 67

On a new and simple rule for approximating to the area of a figure by means of seven equidistant ordinates. By *Thomas Weddle* 79

On the transformation of differential equations. By *W. H. L. Russell* 81

Note on Sir John Wilson's theorem 84

On the calculus of forms, otherwise the theory of invariants. By *J. J. Sylvester* 85

The same.—*Continued* 97

On the integration of linear differential equations. By *W. H. L. Russell* 104

On the integration of linear partial differential equations. By *same* 112

Some theorems on confocal surfaces of the second order. By *Rev. James Booth* 115

Notes on molecular mechanics.—No. III. By *Rev. S. Haughton* 129

Sur une propriété d'un produit de facteurs linéaires. By *Professor François Brioschi* 137

On a particular case of the descent of a heavy body in a resisting medium. By *J. C. Maxwell* 145

On the relation between different curves and cones connected with a series of confocal ellipsoids.—No. II. By *John Y. Rutledge* 148

Maxwell Papers

Page

Demonstration of a theorem of Jacobi, relative to functional determinants. By *Professor W. F. Donkin* . . 161

On a theorem of M. Lejeune Dirichlet's. By *Arthur Cayley* . 163

Mathematical Notes 165

Sur la théorie des fonctions homogènes à deux indéterminés. By *M. Hermite* 172

On the separation of the variables in differential equations of the first order. By *W. H. L. Russell* . . . 217

Remarks on integration. By *Rev. R. Carmichael* . 227

On the curvature of curves in space. By *W. Spottiswoode* . 234

On the conjugate lines of surfaces. By *W. Walton* . 238

The geometry of quaternions. By *J. Paterson* . . 241

The attraction of ellipsoids considered geometrically. By *M. Collins* 255

On the area of the cycloid. By *R. L. Ellis* . . 263

Proof of the parallelogram of forces. By *Arthur Cohen* . 264

Theorems on the quadrature of surfaces and the rectification of curves. By *Robert Carmichael* . . . 266

On the integration of linear and partial differential equations. By *A. H. Curtis* 272

Notes and other passages enclosed in brackets [ ], are insertions made by the Editor.

The date of actual publication of any article, or portion of an article, may be found by referring to the first page of the sheet in which it is contained.—Ed.
